

NEWSLETTER NUUSBRIEF

DEAR VALUED SUPPLIER,

31st May 2018

The Management team at Green Farms Nut Company would like to let you know that we have revised our Rand/\$ currency payment from the original offer of R11.70 to R12.20/\$ for all invoices which will be processed from the 1st June 2018.

Please rest assured that the invoices already processed to date, at the earlier rate, will be adjusted to the new rate in final payments made at the end of February 2019. Since most farmers will have used the invoices already sent for VAT purposes, we deemed it unwise to redo them and create confusion.

Please rest assured that in line with our business model, and our continuous desire to serve growers in the most fair and professional way, and to always strive to give the best prices in the industry, we will of course be fighting for the best rates, and this will all be part of our seasons reconciliation in February 2019. You will get the full benefit of any exchange rate gains!

The sales to date are going exceptionally well, and we will be writing a newsletter on the recent International Tree Nut conference with market up dates in the next week. Demand remains extremely strong and we need every single Kg of nuts to keep our customers supplied and to keep up the confidence in the macadamia industry that we are seeing develop. Green and Gold are extremely proactive and are continually developing new markets and opportunities with our extremely professional and well diversified marketing strategy.

Thank you for your continued support.
